

RPS Academies is a high-performance institution founded on three core pillars:
Intellectual, Academic, and Sports Excellence.

Our aim is to establish a boutique-style academy where each student's aspirations are prioritized and embraced as our own.

Boasting an exceptional team of coaches, educators, and teachers, we dedicate ourselves daily to achieving distinguished goals and fostering an environment of success.

We provide our students with **High-performance tennis training** using a **Specialized curriculum** designed by internationally renowned tennis coach **Gabe Jaramillo**.

Gabe Jaramillo is a renowned international tennis coach who has worked with many of the greatest players in the sport's history. Throughout his career, he's developed eleven of the world's No.1 ranked players and 27 top 10 players, including Agassi, Courier, Sampras, Sharapova, Seles, Nishikori, and many others. The Tennis Director Juan Abuchaibe has worked with professional and college players. We're proud to say that all of our high-performance tennis coaches are certified with our expert-backed system and methodology. Over the past ten years, we have produced six top ten ITF Junior Players, including two number-one players in the world, Maria Camilla Osorio and Shilin Xu.

We specialize in fine-tuning volume and intensity to maximize results. Each morning, our athletes focus on mastering strokes and fundamentals fundamentals such as control, height, depth, placement, and ball speed. In the afternoon, the training shifts to strategic tactical work, allowing athletes to apply their skills in game-like scenarios. This dual-focus approach ensures comprehensive development and improved performance.

Competition

Each day, students challenge each other to improve and further develop their competitive edge. It's crucial for our players to be exposed frequently to new and unpredictable situations and competitors; they will be practicing on hard and clay courts. We are one of the few academies that play matches and point situations daily.

Sharpened Tactical and Cognitive Skills

As part of our methodology, coaches train students with frequent drills designed to control, hurt, and finish, developing greater game intelligence. Students develop sharper tactical awareness with increased perception, strategic analysis, and quick decision-making.

Peak performance Training

Our systematic approach includes all of the fundamental components for peak performance including endurance, strength, power, speed, balance, coordination, agility, flexibility, and nutrition.

Enhanced Stroke Production

We help students improve their strokes with innovative tennis training techniques rooted in long-established biomechanics principles.

Live Ball Drills

The key to tennis success lies in mastering the contact point. Our training emphasizes live ball drills to enhance students' spacing, timing, rhythm, and balance, contrasting with the typical focus on basket drills at most academies. Our methodology not only accelerates improvement, making strokes smoother, but also ensures faster, lasting retention of skills.

Game Based Training

Using closed and open practices our athletes learn fundamentals on patterns of play, style of play, and most importantly they learn the importance of tactical intention while having fun. One thing is to have pretty strokes, another is to know how to play the game.

Daily goal and performance evaluation

At the beginning and the end of each practice, our coaches review the daily goals and evaluate each student's performance.

Things To Know

What is the minimal duration of a reservation:

The minimum duration for a reservation is **one week**, and the average reservation is two to three weeks.

Optimal Duration:

Our recommendation for athletes is to participate in our summer camp for three weeks to maximize the benefits of their stay.

Here's why

Week 1

Absorb Information

During the first week, athletes are immersed in a wealth of valuable knowledge and training techniques. It's a period of intense learning and discovery as they absorb new information and skills.

Week 2

Assimilate Learning

By the second week, athletes have had the opportunity to digest and internalize what they've learned. They begin to refine their techniques, build upon their foundation, and solidify their understanding of key concepts.

Week 3 & 4

Retain and Excel

In the third and final week, athletes are primed to fully retain and apply the knowledge and skills they've acquired. This is when their confidence soars, and they showcase their newfound abilities with proficiency and finesse.

By committing to the full three-week duration, young athletes can experience a progressive journey of growth, development, and achievement, setting them up for success both on and off the field.

Facilities

Our academy boasts state-of-the-art sports facilities, beautifully situated within a secure, gated environment. This family-friendly setting is ideal for athletes looking to enhance all their skills in a safe and supportive atmosphere.

Student Life

We offer more than just a great tennis program. Experience an exceptional opportunity to elevate your game while enjoying a summer filled with engaging activities. Our program offers a structured, supervised schedule featuring both on-site and off-site activities. Discover and enjoy Florida's attractions, including Islands of Adventure, Disney World, and Universal Studios, and more, along with our beautiful beaches.

A closed, gated academy with 24-hour security underscores our commitment to the safety of our young athletes, ensuring a secure environment where they can focus on their development without distraction. This stringent security measure is central to maintaining a safe, controlled space where parents can have peace of mind and students can thrive, both in their sport and in their personal growth.
